

New Building Canada Plan Manitoba

Largest Federal Investment in Infrastructure in Canadian History

The Government of Canada understands the positive impact that quality infrastructure has on economic growth, job creation and long term prosperity. That is why federal investment in infrastructure has increased dramatically since 2006, and is at an all-time high.

The New Building Canada Plan will see the Government of Canada invest over \$53B in infrastructure across the country over the next 10 years (2014-2024).

For Manitoba, this represents almost \$1.2B in dedicated federal funding, including \$467M under the New Building Canada Fund and an estimated \$713M under the federal Gas Tax Fund*.

Manitoba also stands to benefit from:

- \$4B available for projects of national significance
- \$1.25B in additional funding available for P3 projects
- \$10.4B via the GST Rebate which provides municipalities across the country with additional resources to address their infrastructure priorities

Investments that are making a difference

Since 2006, investments of over \$616M under the Building Canada Fund, the Provincial-Territorial Base Fund, the Green Infrastructure Fund, and the Infrastructure Stimulus Fund have assisted the Government of Manitoba and its municipalities to make infrastructure improvements for the benefit of all Manitobans. Municipalities have also benefited from \$412M provided to Manitoba through the federal Gas Tax Fund. Combined with investments under other federal infrastructure programs, Manitoba has benefited from over \$1.2B toward infrastructure improvements across the province.

According to Statistics Canada, the average age of Manitoba's infrastructure has declined by 2.6 years since 2006 to 15.2 years in 2012.

*NOTE: GTF funding by jurisdiction for the first five years (2014-2019) is based on 2011 Census data. GTF funding for 2019-2024 will be based on 2016 Census data. For illustrative purposes, Census 2011 data has been used for all 10 years. Due to the indexation of the GTF, funding for 2019-2024 is expected to be at least equal to GTF funding for the first five years.
